Socio- Economic Field Survey report

Date: 11 July 2026

Venue: Singngat Village

Submitted by: Department of
Social Science

On 11 July 2026, the Department of Social Science organized a socio-economic field survey at Singngat Village for Class X students. The primary objective was to provide hands-on exposure to fieldwork and to collect primary data on the socio-economic conditions of the community.

Students were divided into groups and assigned households to visit. Using a structured questionnaire, they gathered information on key aspects such as demographic profile, occupation, education, health, and housing conditions.

The survey was carried out successfully, thanks to the enthusiastic participation of the students and the cooperation of the villagers. The collected data will be compiled and analyzed as part of the students' project work.

Overall, the field survey proved to be a valuable learning experience. It enhanced students' skills in observation, communication, teamwork, and data collection, while deepening their understanding of real-world socio-economic issues.
